Climate Change 360

Participants in the Chapter's Climate Change 360 event gained perspectives on Pennsylvania's climate change impacts and Pennsylvania Environmental Council (PEC) solution approach, Corporate Climate Change-related projects from the energy sector, industry's climate change management strategies, the Regional Greenhouse Gas Initiative's (RGGI) model for addressing climate change in the Northeast and Mid-Atlantic, and the PA DEP's policies and priorities on issues related to climate change. This interactive session provided a chance for multidisciplinary engineers, policy makers, and business interests to engage in candid discussions on the future of climate change issues in the Delaware Valley region. Thank you to all the speakers and participants for making this a successful event!
