

Bios:

Dr. Guo Quan Lim is an Air Resource Engineer at the California Air Resources Board (CARB). Originally from Malaysia, Dr. Lim completed his bachelor's degree in Mechatronics Engineering at Universiti Tunku Abdul Rahman, Kuala Lumpur. Dr. Lim obtained his master's and doctoral degree in Mechanical and Energy Engineering from the University of North Texas, Denton. During his doctoral degree, Dr. Lim studies the air quality impacts of oil and gas productions on the North Texas airshed. He has experience in the application of traditional air pollution research techniques such as monitoring, dispersion and chemical modeling, and source apportionment analysis. He also performed exploratory work using data mining and machine learning algorithms. Dr. Lim has collaborated with various state and private entities; he is also a published author and reviewer.
