# NJ's Energy Master Plan

- On January 27, 2020, Governor Murphy unveiled the state's Energy Master Plan, which outlines key strategies to reach the Administration's goal of 100 percent clean energy by 2050.
- Plan addresses NJ's energy system, including electricity generation, transportation, and buildings, and their associated greenhouse gas emissions and related air pollutants.
- The Energy Master Plan defines "100 percent clean energy by 2050" as 100 percent carbon-neutral electricity generation and maximum electrification of the transportation and building sectors, which are the greatest carbon emission producing sectors in the state.
- Seven key strategies are outlined, including an implementation plan that lays out next steps and timelines.
- [Energy Master Plan | About the Energy Master Plan \(nj.gov\)](#)

**Janice Fuller**

**Anbaric Development Partners**  
**President, Mid-Atlantic**

**Janice Fuller is President, Mid-Atlantic of Anbaric Development Partners** where she leads efforts to develop offshore wind transmission infrastructure. Prior to joining Anbaric, Ms. Fuller served as Chief of Staff to Congressman and House Energy and Commerce Committee Chair Frank Pallone (NJ-06), where she oversaw staff executing legislation ranging from telecom to environmental issues. She has also held roles as Director of Cabinet Affairs in the administration of Governor Jon Corzine where she oversaw the operations of several state departments and as the Executive Director of a state political party. Ms. Fuller graduated with honors from Boston University. She is an elected member of the Board of Education in her hometown of Ocean, New Jersey, as well as serving as a board member of the Boys & Girls Club of Monmouth County.

**Peter Protopappas**

**AEP OnSite Partners**  
**Director of Business Development**

**Peter Protopappas is Director of Business Development with AEP OnSite Partners** and is responsible for project development, acquisitions and strategy for AEP's customer-centric, distributed energy asset business. Prior to joining AEP, he was with Navigant Consulting and the US Department of Energy conducting policy strategy and engineering analysis for various energy efficiency and renewable energy programs at the federal and state level. Peter has authored federal energy rule makings and research, and his project experience spans the energy efficiency and lighting, solar, fuel cell, and energy storage. He began his career with Black and Decker as a product development engineer designing power tool batteries for Dewalt cordless power tools. Peter is a Certified Energy Manager (CEM) and holds a Bachelor of Science degree in Mechanical Engineering and an MBA with a focus in strategy, both from the University of Maryland, College Park.
